## PROFILE

Student of Front-End and Back-End Systems Development at IDAT and Bachelor's degree holder in Agricultural Engineering from the National Agrarian University La Molina (UNALM). I am an organized and responsible person, focused on achieving objectives. Throughout my education, I have developed strong analytical skills, logical thinking, and problem-solving abilities.

I have experience in front-end and back-end web development using technologies such as React and Node.js, building projects with graphical user interfaces in Python, and working with database management systems such as SQL Server and Oracle SQL Developer.
